Cornerstone Recovery and Supports

CRS Cares “people helping people”

Cornerstone Recovery and Supports (CRS) is committed to providing quality services for mental health consumers. These services are designed to support people in accessing the resources necessary to improve quality of life and maintain a safe living environment.

With CRS assistance, consumers will continue to be valued members of society within the community in which they live.

Community Residential Rehabilitation Services

Cornerstone Recovery and Supports offers Community Residential Rehabilitation Services (CRRS) within the Beaver County area.

These residential services are a gateway for people to develop and hone the skills that will allow them to live independently in their community of choice.

CRS will provide opportunities for consumers to contribute in significant and meaningful ways. They will work side by side with staff in a partnership. This partnership will consist of:

- Secure home like accommodations
- Maintain a clean & sanitary home
- Support in achieving the maximum level of autonomy, independence and self determination
- Money management
- Self medication

CRRS is an independent guidance program for adults. The program is transitional and length of stay will depend on the needs of the individual.

Supported Housing and Supported Housing Case Management

Our Supported Housing program is a pilot program designed for 2-3 people to live together and work as a unit, with some

support personnel assistance, in order to maintain and manage their home.

Supported Housing Case Management is provided to consumers that live independently and maintain their own leases.

These supports include but are not limited to:

- Maintain housing eligibility
- Access community resources
- Become an active member of the community
- Budgeting and money management
- Utilization of appropriate psychiatric services

Housing Specialist

This program furnishes financial and hands-on assistance to adults with serious behavioral health issues (and possibly co-occurring disorders) in securing safe, affordable and permanent supported housing in areas providing easy access to a multitude of community services.
